<b>Scoring Blade</b>	Small Scoring Wheel	Point
<b>Cutting Mat</b>	Thinner, Permanent	Wider, Replacable
<b>Cutting/Scoring Guide Arm</b>	Snaps Down to hold in place, Pulls Up to release	Slide Button to lock and unlock

## TIPS:

- Cutting Cardstock:** Swipe the cutting blade 1 time for 1-2 sheets, 3-4 times for 3-5 sheets. You will need to press more firmly when cutting more than 2 sheets of cardstock. All cuts are clean with no rough edges!
- Scoring Cardstock & other Papers:** Roll the Scoring Blade with medium pressure. With thinner papers such as Vellum and some Designer Series Papers you will need to just use light pressure on the Scoring Blade to prevent cutting or tearing the paper.
- Replacing Cutting and Scoring Blades:** find the small curves toward the bottom metric measurement on the Clear Cutting and Scoring Arm. Slide and lift up to remove. Slide into the curve to replace. Quick and easy!
- Clean Cutting Mat** with Alcohol Swap sheet and Take Your Pick Tool Flat Blade. Clean as needed depending on how much cardstock and paper you cut. Cleaning with help you get a great cut every time!
